

I TO P CONVERTERS

The I/P Converters convert current signal to linearly proportional pneumatic output pressure using Forced Balance (flapper-nozzle) Principle. These units are typically used for pneumatic control valves in industries such as petrochemical, chemical, pulp & paper, aluminium, fertilizer, etc.

- ◆Low cost
- ◆Integral volume booster
- ◆NEMA 4X (IP65) enclosure
- ◆Compact size

Input	: 4 to 20 mA DC
Output	: 3 to 15 psi (0.2 to 1 kg/cm ²)
Supply	: 20 psi (1.4 kg/cm ²) (max : 100 psi)
Output capacity	: 4.5 SCFM
Mounting	: field, wall, 2" pipe
Dimensions	: 107.7mm(H) X 55.4mm (W) X 55.4mm(D)
Weight	: 0.94 kg
